• Appliances

Start planning your dream kitchen today

Kitchen Craftsmen Step-by-Step guide to planning and measuring your new kitchen

Using a tape measure, pencil and paper complete the following steps.

- 1 Draw the outline shape of your kitchen.
- 2 Measure the total width of each wall.
For each window
- 3 a) Measure the distance from the left edge of the window frame to the left corner of the wall. Repeat for the right side of the window.
b) Measure the width of the window, including the frame.
For each door
- 4 Measure the distance from the left edge of the door frame to the left corner of the wall. Repeat for the right side of the door frame.

Once you have completed your plan, bring it in to your nearest Kitchen Craftsmen showroom where one of our friendly consultants will finalise the design using the latest 3D computer system. This allows you to see your new kitchen design in full colour.
